### DETAILED ACTION

Applicant's response of 1/29/08 has been considered with the following results.

#### Errata

Claim 1 is drawn to a product; hence all recitations (such as lines 6; and 15-20) that are drawn to desired results must occur from the limitations/structure positively recited.

#### ***Information Disclosure Statement***

The submitted IDS has been reviewed and made of record.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 1, 12, 17, 23-25 are rejected under 35 U.S.C. 103(a) as being unpatentable over Park et al ('384) or the newly cited JP document 200-298950.

With respect to claim 1, the product claimed elements are depicted/shown in figure 1 of the Park et al reference. Applicants' attention is drawn to the discussion thereof.

With respect to claim 12, the method of reproducing, such is present in Park et al, see the discussion of managing the defective sectors when a system operates upon the product.

With respect to claim 17, method of recording, as discussed in col. 5 starting at line 7 (with respect to figure 5 thereof), appropriate flags are added to the optical recording medium as necessary. The examiner interprets such as disclosing the method of recording onto the disc, wherein the setting of the flags meets the "replacement" limitation.

It is noted that the claims as amended require a plurality of dma sets. Although Park et al depict only one such set, the ability of including more than 1 set of dma areas is considered merely a duplication of parts and obvious to one of ordinary skill in the art especially because no unexpected results are seen to occur from the duplication effects.

Art Unit: 2627

Claims 23-24 parallel the above noted claims 1, 12 and 17 and fall for the same reasoning.

In addition, the newly cited JP document as analyzed in the submitted IDS also depicts a set of dma areas. It also is relied upon under 103 considerations, i.e., again the ability of duplicating the set of dma into sets of dma.

### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
